Cover Letter: Working Student (f/m/d) - AI & Product Automation

SAP Berlin 2026-10-21

Dear SAP team,

I am applying for the Working Student position in AI & Product Automation. Prototyping AI ideas, building dashboards and helping product teams work better is exactly the mix of AI and analytics I want to work on, and doing it at SAP connects directly to my SAP background.

I am an M.Sc. Data Science student at TU Ilmenau. Before moving to Germany I worked as a Business Analyst at Tapal Tea and in SAP data & analytics consulting at TallyMarks Consulting, building dashboards, data models and SQL-based reporting for business teams.

- **Explaining to stakeholders,** I prepared and presented SAP Analytics Cloud to a client, who subsequently purchased it
- **Replacing manual checks,** I replaced a quality check where users opened an SAP report for each of thousands of materials and compiled results in Excel with a single SAP Analytics Cloud dashboard
- **Learning new platforms fast,** I joined a team migrating 42 dashboards from SAP BW to SAP Datasphere and independently rebuilt a full dashboard and its data pipelines

I would bring basic dashboards and reports, SQL, Python, careful documentation and strong presentation skills, and I use ChatGPT and Claude daily. I have not yet built LLM-based tools in a product team, but prototyping them with your support is exactly what I want to learn.

I am available immediately for 10 to 20 hours per week and am happy to relocate to Berlin. I would be glad to discuss how I can contribute.

I work in English (IELTS 8.0) and am currently learning German (A1).
