## Cover Letter: Student Helper - Product Development & AI (m/f/d)

Ericsson Herzogenrath / Aachen 2026-10-17

Dear Ericsson Product Development team,

I am applying for the Student Helper position in Product Development & AI. Exploring how AI can improve engineering workflows and knowledge management in a large, global organisation is exactly the kind of applied AI work I want to do alongside my M.Sc. in Data Science.

I am an M.Sc. Data Science student at TU Ilmenau with a B.S. in Artificial Intelligence. I also bring industry experience in data analysis and dashboards from SAP data & analytics work at TallyMarks Consulting and Tapal Tea.

- **Knowledge graphs,** in a team project I extracted subject-relation-object triples from Reddit text to build a knowledge graph and compared graph-based and language-model embeddings (BERT, GPT-2) for clustering
- **Python and machine learning,** I built a PyTorch retinal OCT classifier reaching 94.11% accuracy on a 968-image test set, and worked on an EfficientNet-B0 and EasyOCR video pipeline for my thesis
- **Dashboards and knowledge sharing,** I built SAP Analytics Cloud dashboards, handled support for around 30 dashboards across departments, and documented every dashboard I built

I would support your team with Python scripts, data analysis, dashboards and proof-of-concept work, and contribute to knowledge management through clear documentation. I use tools like ChatGPT and Claude myself and am keen to learn AI-assisted development, Git and Linux workflows in a real engineering organisation.

I am available immediately for 15 to 20 hours per week and am happy to relocate to the Aachen area. I would be glad to discuss how I can contribute.

*I work in English (IELTS 8.0) and am currently learning German (A1).*
