M.Sc. Data Science (in progress), TU Ilmenau | B.S. Artificial Intelligence | Four SAP Certified Associate certifications

Cover Letter: Working Student Data Engineering

Solactive AG Dresden 2026-10-31

Dear Ms Urusaro,

I am applying for the Working Student position in Data Engineering in Dresden. You ask for Python, Git, Docker and data exploration with SQL, and these are the tools I used to build and ship my latest project.

I am an M.Sc. Data Science student at TU Ilmenau with a B.S. in Artificial Intelligence. Before my Master's I designed data pipelines and data models in SAP data and analytics at TallyMarks Consulting.

- **Python, Git and Docker,** I built DocuMind, a RAG application with 37 offline unit tests, GitHub Actions CI and a Docker image
- **Data pipelines,** I designed and implemented SAP Datasphere data pipelines connecting the required sources
- **SQL,** I used SQL analysis, validation and reconciliation to keep reporting accurate

I would help build and test data pipelines, explore data with SQL and Python and document my work. My Linux and shell scripting experience is basic, and I would build it up quickly on the job.

I am willing to relocate to Dresden and can work up to 20 hours per week, starting immediately. I would be glad to discuss the role.

I work in English (IELTS 8.0) and am currently learning German (A1).
