PROFESSIONAL SUMMARY

M.Sc. Data Science student at TU Ilmenau with a **B.S. in Artificial Intelligence**. Built and evaluated **DocuMind, a RAG application with the Claude API** (hybrid retrieval, LLM-as-judge evaluation, FastAPI, Docker, CI), plus industry experience building **data pipelines, data models and validated reporting**. Careful about evaluation: knows when a system works, when it fails, and why.

TECHNICAL SKILLS

- **AI & ML:** Python | PyTorch | scikit-learn | NLP (spaCy, BERT, GPT-2 embeddings) | computer vision (EfficientNet, OpenCV, EasyOCR) | model evaluation | ChatGPT & Claude (daily use)
- **Data:** SQL | Pandas | NumPy | data pipelines | data modelling | data validation & reconciliation | SAP Datasphere
- **LLM apps (projects):** RAG | Claude API | ChromaDB | BM25 | FastAPI | Streamlit | pytest | Docker | Git/GitHub Actions
- **Languages:** English C1 (IELTS 8.0) | German A1 (currently learning)

PROFESSIONAL EXPERIENCE

▷ **Business Analyst** — **Apr 2026 - Sep 2026**

Tapal Tea (Pvt.) Ltd. - (Karachi, Pakistan)

- Performed SQL analysis, ABAP CDS view validation and data reconciliation to support reporting accuracy
- Built a quality inspection dashboard in **SAP Analytics Cloud** on a data model built from **ABAP CDS view** data sources and joins, replacing a manual process of opening an SAP report per material for thousands of materials and compiling defect status in Excel
- Handled daily support tickets and user queries for around 30 SAC dashboards across HR, finance, supply chain and procurement, including dashboards built by others
- Translated business requirements into KPI-based reporting and documented data sources, calculations and results for every dashboard I built

▷ **SAP Young Professionals Program (YPP)** — **Aug 2025 - Sep 2025**

SAP Authorized Training Program - (Karachi, Pakistan)

- Selected as **one of 10 participants from Pakistan** for the SAP Young Professionals Program
- Studied SAP Cloud Integration (CPI) concepts including message mappings, iFlows and integration scenarios

▷ **Management Trainee Officer, Data Planning & Analytics** — **Jun 2025 - Apr 2026**

TallyMarks Consulting (TMC) - (Karachi, Pakistan)

- Designed and implemented SAP Datasphere data pipelines connecting the required sources
- Independently built the spinning dashboard end to end: investigated sources and dependencies, rebuilt the datasets in SAP Datasphere and rebuilt the SAC dashboard (OEE, machine efficiency and utilization, downtime, yield)
- Part of a team migrating a textile manufacturer's **42 SAC dashboards from SAP BW to SAP Datasphere**

▷ **SAP Data Analyst Intern** — **Jun 2024 - Aug 2024**

Tapal Tea (Pvt.) Ltd. - (Karachi, Pakistan)

- Wrote complex SQL queries to integrate company-wide data with SAC, enabling seamless data updates and minimizing reliance on manual extraction

PROJECTS

▷ **DocuMind: RAG Q&A over technical PDF manuals** *Personal project | github.com/Rayyan3079/documind-rag*

Built a RAG system that answers questions about PDF manuals with page citations; **91% correct** on a 22-question test set, refused all 4 unanswerable questions, 3.3 s median latency. **Hybrid retrieval** (BM25 + semantic, Reciprocal Rank Fusion) raised MRR from 0.748 to 0.898. Evaluation harness with hit rate, MRR and an LLM judge; 37 offline unit tests, CI and Docker.

Python, FastAPI, Streamlit, ChromaDB, BM25, Claude API, pytest, Docker, GitHub Actions

▷ **Knowledge Graph Construction & Clustering from Reddit Text** *team project*

Extracted subject-relation-object triples from unstructured text and **compared language-model embeddings (BERT, GPT-2) with graph embeddings (Node2Vec)** for clustering with K-Means and HDBSCAN.

Python, spaCy, NetworkX, Node2Vec, BERT, GPT-2

▷ **Retinal OCT Scan Classification**

4-class medical image classifier; **94.11% accuracy** on a 968-image test set.

PyTorch, EfficientNet-B0, OpenCV

EDUCATION

M.Sc. Data Science - *Technische Universität Ilmenau*, **Ilmenau, Germany** — Oct 2026 - present

Courses: Bayesian Data Assimilation, Sequential Decision Making, Theoretical Foundations of Data Management

B.S. Artificial Intelligence - *FAST-NUCES*, **Karachi, Pakistan** — 2021 - 2025

CGPA 3.49/4.00 (German grade equivalent: 1.7, converted)

CERTIFICATIONS

- SAP Certified Associate: SAP Analytics Cloud (Data Analyst) (2025)
- SAP Certified Associate: SAP Business Data Cloud (2025)
- SAP Certified Associate: SAP S/4HANA Cloud Public Edition, Implementation Consultant (2025)
- SAP Certified Associate: SAP Integration Developer (2025)
