PROFESSIONAL SUMMARY

M.Sc. Data Science student at TU Ilmenau with a **B.S. in Artificial Intelligence**, including coursework on how large language models work. Hands-on **Python and PyTorch** projects in computer vision and NLP, including **comparing BERT and GPT-2 embeddings** for text clustering, plus industry experience building **data pipelines, data models and validated reporting**. Careful about evaluation: knows when a model or pipeline works, when it fails, and why.

TECHNICAL SKILLS

- **AI & ML:** Python | PyTorch | scikit-learn | NLP (spaCy, BERT, GPT-2 embeddings) | computer vision (EfficientNet, OpenCV, EasyOCR) | model evaluation | ChatGPT & Claude (daily use)
- **Data:** SQL | Pandas | NumPy | data pipelines | data modelling | data validation & reconciliation | SAP Datasphere
- **Tools:** FFmpeg | NetworkX | Node2Vec | SAP Analytics Cloud | Excel | PowerPoint
- **Languages:** English C1 (IELTS 8.0) | German A1 (currently learning)

PROFESSIONAL EXPERIENCE

▷ **Business Analyst** **Apr 2026 - Sep 2026**
Tapal Tea (Pvt.) Ltd. - (Karachi, Pakistan)
- Performed SQL analysis, ABAP CDS view validation and data reconciliation to support reporting accuracy
- Built a quality inspection dashboard in **SAP Analytics Cloud** on a data model built from **ABAP CDS view** data sources and joins, replacing a manual process of opening an SAP report per material for thousands of materials and compiling defect status in Excel
- Handled daily support tickets and user queries for around 30 SAC dashboards across HR, finance, supply chain and procurement, including dashboards built by others
- Translated business requirements into KPI-based reporting and documented data sources, calculations and results for every dashboard I built

▷ **SAP Young Professionals Program (YPP)** **Aug 2025 - Sep 2025**
SAP Authorized Training Program - (Karachi, Pakistan)
- Selected as **one of 10 participants from Pakistan** for the SAP Young Professionals Program
- Studied SAP Cloud Integration (CPI) concepts including message mappings, iFlows and integration scenarios

▷ **Management Trainee Officer, Data Planning & Analytics** **Jun 2025 - Apr 2026**
TallyMarks Consulting (TMC) - (Karachi, Pakistan)
- Designed and implemented SAP Datasphere data pipelines connecting the required sources
- Independently built the spinning dashboard end to end: investigated sources and dependencies, rebuilt the datasets in SAP Datasphere and rebuilt the SAC dashboard (OEE, machine efficiency and utilization, downtime, yield)
- Part of a team migrating a textile manufacturer's **42 SAC dashboards from SAP BW to SAP Datasphere**

▷ **SAP Data Analyst Intern** **Jun 2024 - Aug 2024**
Tapal Tea (Pvt.) Ltd. - (Karachi, Pakistan)
- Wrote complex SQL queries to integrate company-wide data with SAC, enabling seamless data updates and minimizing reliance on manual extraction

PROJECTS

▷ **Knowledge Graph Construction & Clustering from Reddit Text** *team project*
Extracted subject-relation-object triples from unstructured text and **compared language-model embeddings (BERT, GPT-2) with graph embeddings (Node2Vec)** for clustering with K-Means and HDBSCAN.
Python, spaCy, NetworkX, Node2Vec, BERT, GPT-2

▷ **Automated Cricket Highlights Generation** *B.S. Thesis, team project*
Created training data, **evaluated and tuned** an EfficientNet-B0 model, **tested EasyOCR configurations** for scoreboard extraction, and built the pipeline that assembles highlights from detected events.
Python, PyTorch, OpenCV, EasyOCR, FFmpeg

▷ **Retinal OCT Scan Classification**
4-class medical image classifier; **94.11% accuracy** on a 968-image test set.
PyTorch, EfficientNet-B0, OpenCV

EDUCATION

M.Sc. Data Science - *Technische Universität Ilmenau*, **Ilmenau, Germany** Oct 2026 - present
Courses: Bayesian Data Assimilation, Sequential Decision Making, Theoretical Foundations of Data Management

B.S. Artificial Intelligence - *FAST-NUCES*, **Karachi, Pakistan** 2021 - 2025
CGPA 3.49/4.00 (German grade equivalent: 1.7, converted)

CERTIFICATIONS

- SAP Certified Associate: SAP Analytics Cloud (Data Analyst) (2025)
- SAP Certified Associate: SAP Business Data Cloud (2025)
- SAP Certified Associate: SAP S/4HANA Cloud Public Edition, Implementation Consultant (2025)
- SAP Certified Associate: SAP Integration Developer (2025)
